

Based on numerous projects as well as customer feedback, we've compiled a list of the recommended finish based on refrigerator brand. If in doubt, we encourage you to order samples at any time so you can see each finish in person. Alternatively, you can view our gallery and we might have a photo of your brand paired with the recommended finish. If we don't have a photo in our gallery, you may also email us for a photo.

**A note about "finish"...**

While our finishes pair nicely with nearly any refrigerator, it's hard to perfectly match every make and model on the market. For this reason, we like to point out that **even OEM kits often do no match their respective refrigerator perfectly**. For example, see the photo below of a factory OEM Frigidaire kit. Next time you are at your local appliance showroom take a look at the Frigidaire columns, you will see quite a difference between the finish of the kit and the finish of the refrigerator. **The bottom line....**in our experience (based on feedback from many happy customers) the finish of the kit does not have to match the refrigerator perfectly to achieve a high-end built in look.

Brand	Finish	Confidence Level
Bertazzoni	Bright	100%
Blomberg	Bright	100%
Bosch	Bright	100%
Electrolux	Bright	100%
Fisher & Paykel ( <i>see note 1</i> )	Bright	70%
Forno	Bright	100%
Forte	Bright	60%
Frigidaire	Bright	100%
GE	Bright	100%
Hisense	Matte	100%
Jennair	Bright	100%
Kitchenaid	Bright	100%
LG	Bright	100%
Liebherr	Bright	100%
Samsung ( <i>see note 2</i> )	Bright	100%
Subzero	Bright	100%
Viking	Bright	100%
Whirlpool	Bright	100%
Zline	Bright	100%

*Note 1: We have had customers choose Matte finish for Fisher & Paykel. It seems to depend on kitchen lighting. If concened, we recommend ordering samples so you can hold them up next to your refrigerator and assess how the lighting effects each finish.*

*Note 2: Bright finish is recommend for all Samsung models except RZ11M7074SA. For this model, we recommend our matte finish.*
